

Hurricane Screens

Protection from the Harshest Elements

Hurricanes are known for causing mass destruction. From uprooting trees to ripping roofs off homes, these storms are not something to take lightly. Crimsafe Hurricane-rated screens can withstand winds and airborne debris up to 150pmh. That's a category 4 hurricane.

Storm Screens VS Roll-Down Shutters?

For decades the preferred choice of home storm protection was roll-down shutters. While effective, roll-down shutters have their flaws. For one, they require bulky units to be installed on the outside of your home. They are also only protecting your home IF you roll them down. Storm Screens are ready to defend your home 24/7 with no additional action. Best of all, there is no bulky equipment.

Additional Benefits

- Reduce radiant heat from door and windows
- Ventilate your home without compromising your safety
- Year-round screens means less work for you during hurricane season
- Screens also defend against other elements like brushfire, hail, and accidental damage

Crimsafe Goes Above and Beyond

The Crimsafe Hurricane screens offers the highest quality materials keeping your home secure during harsh weather.

Double the Clamping Force: With screws every 2 inches instead of every 5 inches compared to our standard product, the hurricane line has double the clamping force. This makes it hurricane rated.

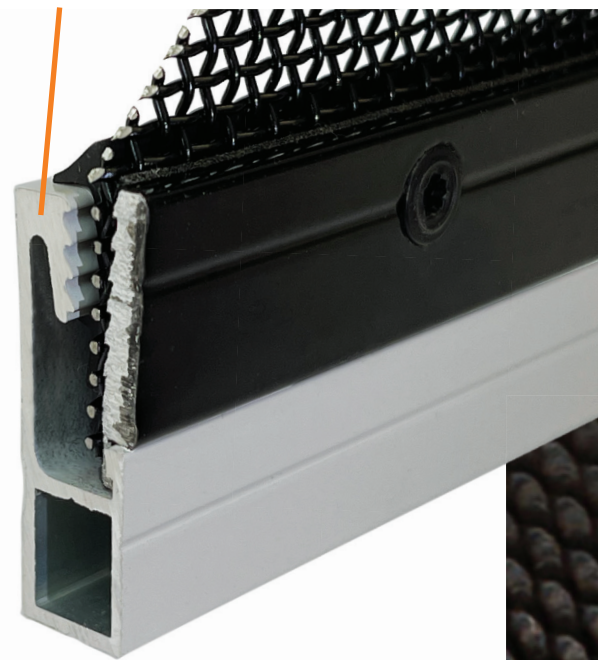

'Build-Out' Feature: When a window or door is broken in, the extreme winds creates pressure in a building that can cause its roof to come loose. Protect your them with our unique 'build-out' window covering.

Anti-Tamper Hardware: Never worry about looters or burglars with our proprietary screws and pry-proof frame. Crimsafe defends your home, rental, or commercial property against all forces.

Crimsafe's Screw-Clamp Tech frame grips the mesh stronger as more force is applied.

Security and Storm Screens offer a wide range of applications.

- Hinged Doors
- Sliding, Folding, & Stacking Doors
- Fixed Windows
- Emergency Exit Windows
- Patio Enclosures
- Commercial Use
